Introduction

Venture Learning is committed to continuous improvement and development. We put the student at the forefront of our vision and recognise the need to adapt and refine our practice to meet the changing needs of our cohort.

This policy aims to:

- improve provision for students' learning, progress and achievement;
- ensure consistently high quality learning experiences for all our students; and,
- ensure that all students are given opportunities to realise achievable goals.

Self-evaluation processes enable us to gain knowledge of our current strengths, as well as highlighting areas for further development. We are committed to developing strategies and structures that support staff to develop their skills and knowledge, and continuously improve teaching, learning and high quality educational provision.

Our commitment to review and evaluate all our practices enables us to constantly monitor the quality and relevance of support, training and continued professional development (CPD). CPD should always be focussed on improving the quality of provision at Venture Learning.

Quality assurance and self-evaluation procedures will operate at an individual, team and whole school level and will always frame review processes within a simple structure:

- How well am I/are we doing?
- How do I/we know?
- What are my/our strengths or weaknesses?
- What should I/we do to improve?
